

STEPS			
#	Action	Expected value	Attachments
1	Execute call to generate public key for target device	Target public key is generated successfully	

Test case [52908](#): API Interface call for private key retrieval - Cumulocity Backend

SUMMARY
After getting definition from IT for private key retrieval the operation must be tested

STEPS			
#	Action	Expected value	Attachments
1	Execute call to retrieve private key for target device	Private key is retrieved	

STEPS			
#	Action	Expected value	Attachments
1	Push OS update	OS update is pushed	
Test case 52904 : Push App updates - Cumulocity WebUI			
SUMMARY App updates are pushed to target(s) using device management interface (Cumulocity WebUI).			
STEPS			
#	Action	Expected value	Attachments
1	Push App update(s) using Cumulocity to target device(s)	App update is successful	
Test case 52905 : Assign calendars to devices - Cumulocity WebUI			
SUMMARY Calendar items corresponding to devices for spaces are assigned using Cumulocity WebUI dashboard.			
STEPS			
#	Action	Expected value	Attachments
1	Assign calendar(s) to device(s)	Calendar(s) are assigned to device(s)	
Test case 52915 : Assign Device to Space Hierarchy - Cumulocity WebUI			
Test case 52917 : Account Management - Cumulocity WebUI			
Test case 52918 : Log files configuration - Cumulocity WebUI			
Test case 52919 : Device dashboard - Cumulocity WebUI			

STEPS			
#	Action	Expected value	Attachments
1	Use device interface to change color and behavior of LEDs. Initially may use APIs from Vantron application. TODO: Elaborate steps	API calls result in LED color and behavior change	

Test case [64489](#): About screen

STEPS			
#	Action	Expected value	Attachments
1	Open About screen	About screen is open	
2	Verify expected features	Expected features are verified	

Test case [64515](#): Device dashboard

STEPS			
#	Action	Expected value	Attachments
1	Open Device dashboard	Device Dashboard is open	
2	Confirm all features present and working	All features are working	

Test case [64551](#): Adjust Date/Time settings

STEPS			
#	Action	Expected value	Attachments
1	Launch reservation app	Reservation app is launched	
2	Open Date/Time setting interface	Date/Time interface is open	
3	Note Date and Time	Date and Time are noted	
4	Change Date	Date is changed	
5	Change Time	Time is changed	
6	Restore Date/Time	Time and Date are restored	

Test case [64555](#): Notification setup

STEPS			
#	Action	Expected value	Attachments
1	Open notification interface	Notification interface is open	
2	Add a notification	Notification is added	
3	Observe notification	Notification is observed	

Test case [64566](#): Device menu

STEPS			
#	Action	Expected value	Attachments
1	Open Device Menu	Device Menu is open	
2	Verify features of Device Menu	Device Menu features are verified	

Test case [64567](#): Meeting Room main screen

STEPS			
#	Action	Expected value	Attachments
1	Open Meeting Room main screen	Meeting Room main screen is open	
2	Verify Meeting Room main screen features	Meeting Room main screen features are verified	

Test case [64548](#): Performance test and optimization

STEPS			
#	Action	Expected value	Attachments
1	Performance. Test. Optimization.	Performed. Tested. Optimized.
